The Dental CR Vet Premium Solution for Veterinary Professionals

The full-featured FireCR Dental Vet Premium from DIGIRAY rapidly and reasonable delivers high-quality dental images for busy veterinary practices and veterinary dental clinics.

Compact & Reasonable

The FireCR Dental Vet Premium is compact and reasonable, helping to increase patient throughput and improve the productivity of your practice or clinic. With its small footprint, the reader fits seamlessly into even the most space-challenged veterinary offices and exam rooms.

Simple, Streamlined Operation

The FireCR Dental Vet Premium combines an elegant design with a powerful yet easy-to-use system that gets the job done day in and day out.

The FireCR Dental Vet Premium's automated, magnetized feeding tray offers "push and go" functionality, making it simple to operate for busy technicians. The reader is DICOM 3.0 compatible and uses a full range of reusable bitewing and intraoral imaging plates that are easier and faster to position than intraoral digital sensors. Importantly, a true size 4c and size 4 imaging plate is available, so technicians don't have to use software stitching to combine images from two size 3 plates a cumbersome and inefficient process.

Unmatched Flexibility to Help Your Practice Grow

In this increasingly competitive environment, show clients that your practice offers the latest in digital imaging technology. Whether you're a busy veterinary practice or a specialty veterinary dental clinic, the next generation FireCR Dental Vet Premium is the natural choice for practices looking for an reasonable solution that delivers high-quality digital images along with the flexibility that helps them grow.

Unique LCD Color Touch Screen Panel

The FireCR Dental Vet Premium features a unique color LCD touch-screen panel for seamless device operation. With no physical push buttons on the unit and an intuitive user interface, entering operator instructions has never been easier.

The screen provides device activity status and includes a sleep mode. It visually guides users in the operation of the system, with little or no training needed. It also presents a preview of the image, allowing technicians to verify image quality. A settings menu allows technicians to customize scanning resolution (high or standard, auto sleep timing, auto start and network settings).

Built-in Erase Function

A built-in erase function eliminates the need to purchase an additional device to erase imaging plates prior to reuse, improving efficiency and reducing costs.

Large size image plate

Improving Efficiency for Dental Practices

FireCR Dental Vet Premium that supports image plate Size 4c & Size 4 improves efficiency by observing X-ray images over a larger area.

FireCR Dental Vet Premium supports imaging plate Size 4c & Size 4 to support rapid examination and reduce radiation exposure of patients.

In addition, using a large area as well as the dental area, it helps in X-ray examination for fractures and post-operative follow-up of small animals' extremities.

Software

Easy-to-Use Imaging Software

QuantorDent Vet Imaging Software optimizes image acquisition and management. The easy-to-use software supports efficient veterinary practice workflow and requires little training. To ensure that scans are arranged in their precise locations, the operator simply picks the relevant tooth on the dental chart in the software.
