

MEDLINE SURGICAL GOWNS

Performance, Variety and Quality

An extensive choice

To satisfy any preference in the OR, we offer five different options in fabric, each with their own distinct style and reinforcement to offer clinicians their preferred surgical gown.

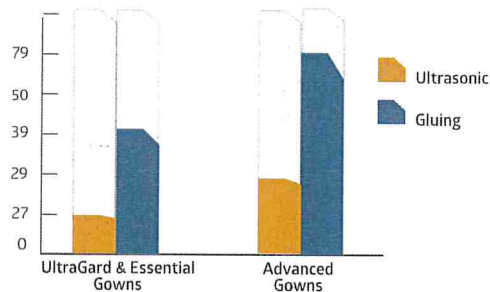

Dependable protection

Medline's gown fabrics offer high protection. Each gown is latex-free and meets or exceeds the minimum performance requirements of the EN 13795 standard. The Essential and Advanced materials have a high hydrostatic head and extra Alcohol Repellency treatment which gives wearers the protection they need and the comfort they deserve. The unique Ultimate gown offers all-over impervious protection with exceptional breathability.

High performance with high comfort

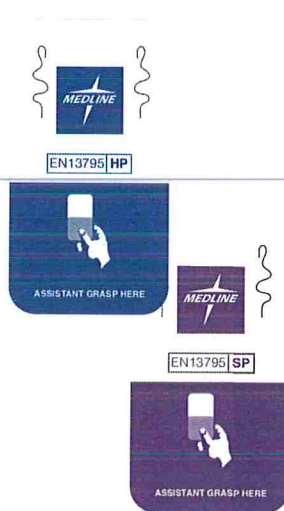

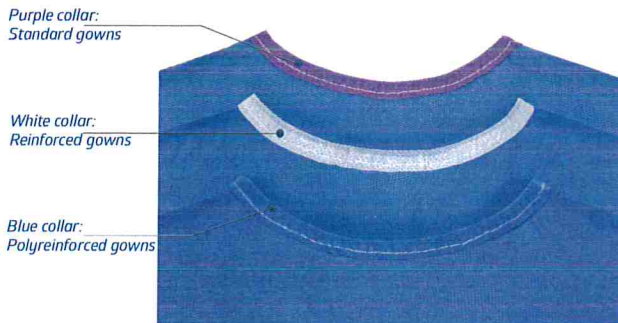

All our surgical gowns offer various features for greater comfort and ease of use to the OR staff members. High-tech breathable fabrics keep the wearer comfortable and dry, even during long procedures. The gowns feature sleeves with glued seam which bring higher strength and comfort.

Average Sleeve Seam Tensile Strength (N)

Easy to use

All Medline surgical gowns feature intuitive colour coding. Product labels and transfer tabs display purple for standard performance or blue for high performance, for easier gown selection in the OR. We offer three different gown collar colours to quickly identify the gown style: standard, fabric reinforced or poly reinforced.

Eclipse®

A soft and comfortable gown

- Outstanding comfort and breathability
- Spunlace (68 gsm) with textile like appearance
- Suitable protection

Item.	Item Description	Qty/Case
9505CEA	Surgical gown, S/M, 115 cm	28

* This item is also available packed in a dispenser box.

* The EN 13795 is the European harmonized standard specifying requirements for single-use and reusable covering (i. e. surgical gowns, surgical drapes) used as medical devices for patients, clinical staff and equipment and intended to prevent the transmission of infective agents between patients and clinical staff during invasive surgical procedures.
 **AAMI: Association for the Advancement of Medical Instrumentation. The AAMI PB70 is the US reference standard establishing a system of classification for protective apparel and drapes based on their liquid barrier performance and specifies related labeling requirements and standardized test methods.
