

VETINOX has developed a fine comfortable range of smooth heat-preserving polyester cages which are manufactured in our factory in France from the finest components to meet the highest standards and make sure that a hospitalized cat is as comfortable as possible while helping to reduce stress.

VETINOX polyester cages come in 3 different sizes (A, B and C), they are modular, stackable, and available either with a stainless-steel grid or a glass door (with or without oxygen hole).

With VETINOX cages you will save time and money on your installations, as combining and stacking our polyester cages has never been easier: you just plug the cages to one another with the connectors.

Once you have either chosen a set VETINOX combination of cages or created your own, we recommend installing it on one of our convenient **mobile platforms**: with easy access to patients, cages move freely for easy cleaning or reorganization purposes.

VETINOX polyester cages are slightly tilted forwards and feature the specially designed VETINOX tray for the collection of the patient's fluids. This eases daily work and helps keeping the clinic clean and tidy.

Polyester cages come without gratings and can be combined either with VETINOX's gratings or CliniCare bed sore prevention mattresses.

## POLYESTER CAGE A, B, C with a stainless-steel grid door

**CP200000**  
Polyester cage A

**CP200010**  
Polyester cage B

**CP200020**  
Polyester cage C

VETINOX polyester cages with stainless-steel doors concentrate all VETINOX's know-how: qualitative, sturdy, silent and very comfortable to ensure patients enjoy a quiet stay. We have also designed different accessories like lamp supports, I.V. holders, card holders and medication trays in different sizes and shapes that perfectly fit onto our cages. C cages are delivered without partition.

## POLYESTER CAGE A, B, C with a glass door (with or without oxygen hole)

**CP200005**  
Polyester cage A

**CP200015**  
Polyester cage B

**CP200115**  
Polyester cage B w/ O<sup>2</sup> hole

VETINOX polyester cages with glass doors give a modern look and offer great visibility on patients. We also have glass doors with an oxygen hole which can be fitted with an "O<sup>2</sup>fix" for easy connection. Glass doors can also be fitted afterwards onto VETINOX cages. We have also designed different accessories like lamp supports, I.V. holders, card holders and medication trays in different sizes and shapes that perfectly fit onto our cages. C cages are delivered without partition.

ITEM	OUTSIDE DIMENSIONS (mm)			INSIDE DIMENSIONS (mm)			MATERIAL	
	Width	Depth	Height	Width	Depth	Height	M 1	M 2
Cage A	485	600	465	425	595	400	Polyester	Stainless steel 304 L
Cage B	730	650	670	670	645	610	Polyester	Stainless steel 304 L
Cage C	1460	685	832	1400	675	770	Polyester	Stainless steel 304 L
