PRECISION. PERFORMANCE. PLEASURE.

AESCULAP® ELAN 4

PRECISION. PERFORMANCE. PLEASURE.

Engineered in Germany.

As a surgeon you do the best job possible in order to restore your patients' quality of life, maintain their health or even save their lives, regardless of the constant pressure you are exposed to.

This responsibility made you a real perfectionist.

Peak performance, high precision and reliability are the claims you place upon yourself and anything that surrounds you. Because products that embody these values, support you in achieving your most ambitious goals.

Why should you
accept compromises?

PLEASURE

AESCULAP® ELAN 4

PRECISION. PERFORMANCE. PLEASURE.

Why did you choose the timepiece you are wearing? Because it is an artwork of accuracy, capturing value and eternal reliability? Do you appreciate how virtuously it is manufactured, even in the minutest detail? Did it become a part of you, hardly perceptible?

ELAN 4 aims to be the same – to meet the high demands in terms of precision, reliability and usability.

Will it convince you?

ERGONOMICS

INNOVATIVE GERMAN ENGINEERING:

- › New positioning of the motor before the angle, meaning there is no need for an angle gear or a motor coupling.

RESULT:

- › no couplings needed
- › handpieces become shorter and lighter
- › the angle does not get hot
- › sits comfortably in the hand
- › can be held more reliably and comfortably

BENEFITS:

*high-precision, convenient
and reliable grip*

AESCULAP® ELAN 4

PRECISION. PERFORMANCE. PLEASURE.

What are the features you decide upon when buying a car?

Certainly you require reliability and enough horsepower. A car needs to accelerate quickly when required, it needs to cruise smoothly on long journeys and has to take you to your destination quickly and safely.

Power and reliability. This is what you can expect of ELAN 4, too. ELAN 4 is our answer to raise the bar in terms of overall performance.

Get the speed you need.

HIGH-SPEED

DESIGN
AWARD
2016

The Winner of the
iF DESIGN AWARD 2016
Category Medicine / Healthcare

INNOVATIVE GERMAN ENGINEERING:

- › integrated motors
- › on/off function integrated into the cable or hose to the motor coupling

RESULT:

- The rotation speed is directly transferred, resulting in
- › very smooth running
 - › no loss of power
 - › high reliability
 - › compact construction – no extra switch

BENEFITS:

*quick, powerful and
reliable work*

AESCULAP® ELAN 4

PRECISION. PERFORMANCE. PLEASURE.

In our high-tech world, simplicity is a luxury – “ease of use” and “joy of use” are almost synonyms.

It's more fun when things just work intuitively, without the need for headscratching or guesswork. Just like a smart phone:

you simply need to follow your intuition. The apps you prefer are clearly arranged on the home screen. Personalized technology.

The same is true of the ELAN 4. You can select the motor drive type you are used to. The systems are straightforward and operation is self-explanatory.

The couplings work according to the plug and play principle and the burrs fit every length of handpiece. Work will be easier and finally: even more joyful.

A new experience.

TWO SYSTEMS

INNOVATIVE GERMAN ENGINEERING:

- all couplings are plug and play compatible
- standardised burr lengths and clear coding of burs
- all operating elements are marked gold

RESULT:

- easy to use
- streamlined surgical set with fewer components
- handpiece will always contain the correct motor
- self-explanatory
- all types and sizes of burs are available for all handpiece lengths

BENEFITS:

The system is a joy to work with because it is set up clearly and simply. Fewer components and a universal burr length offer savings potentials.
