Follow us!

Top quality medical equipment adapted to Vets!

Dear Customers, Dear Partners,

Mano Médical has just celebrated its 25th anniversary with a lovely present: brand-new premises, much larger and better laid out, which will enable us to work in better conditions and further improve our quality of service.

The Mano Médical team continues to grow, to provide you with even more advice, support in your choices and the completion of relevant, innovative and effective solutions. Do not hesitate to call on us!

This 2025 catalogue presents you with the updated scope of our product portfolio, including a number of exciting new solutions.

We hope you will enjoy reading it. Thank you for your confidence.

D. CATINAUD, DVM – General Manager

Digital X-ray

EQUINE FLAT PANEL DR Imaging WIFI

- Transported in a rigid, water-proof case highly resistant to impacts
- Long-life battery
- Small size and handle for easy transportation (333 x 282 x 15 mm, 2.8 kg)
- Completely wireless

Computer not included

PRE-PURCHASE EXAMS MADE EASIER!

AUTOMATIC measurements, image labeling, rotation and calibration
WITH A SIMPLE CLICK, share images or reports via email or cloud server

SOFTWARE AND ARTIFICIAL INTELLIGENCE

A whole world of possibilities to facilitate
the work of equine veterinarians

- Automatic measurements
- Automatic image labeling
- Automatic hoof measurements and mark-up
- Automatic image location, calibration, cropping and rotation

- No need to predefine a worklist
- No need to return to the computer to label images
- Deep learning : Intellect module learns from experience and improves its detection capabilities

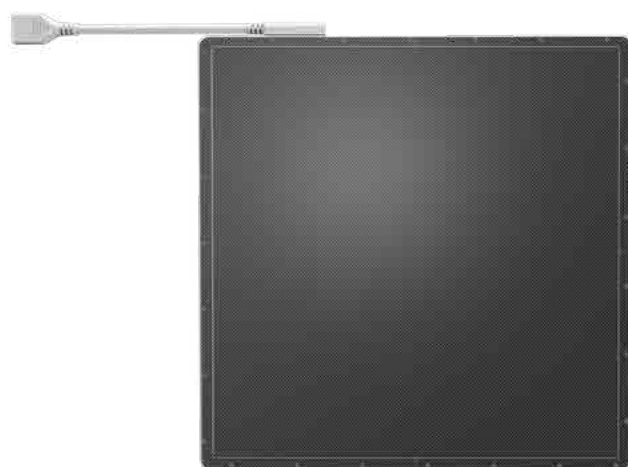

FLAT PANEL DR Series

- CE Medical silicon CsL flat panel
- Equipped with highly sensitive AED function
- High resolution image
- Can be easily connected to and synchronised with any kind of X-ray generators

- Image acquisition within 1" and 3" for wireless panel
- HD resolution (99 μm) available on the 43x43 flat panel
- Wireless flat panel: battery stands for 14 hours (Mano DR941)
- Rigid case made of carbon, polycarbonate and ABS

Mano DR 940

| Mano DR 942 | 43x43 | Wired | 99 μm | HD Small animal | |

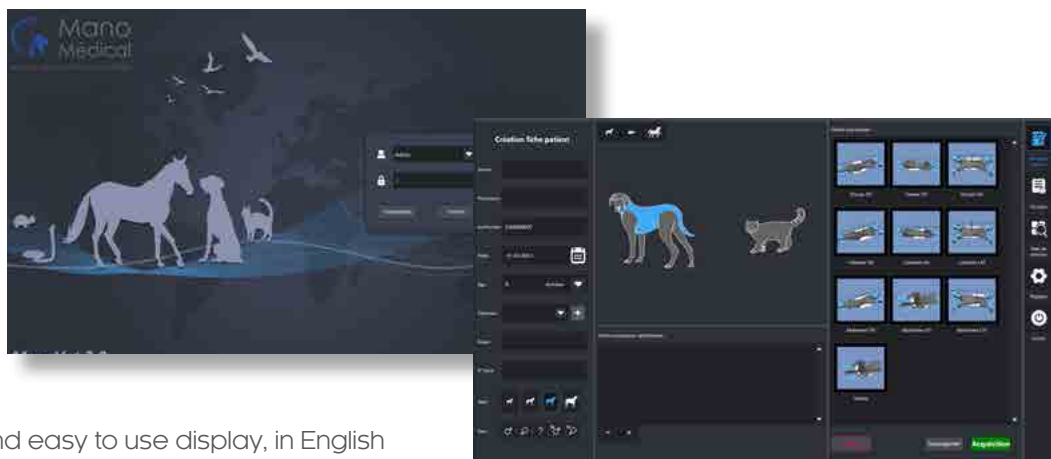

DEDICATED SOFTWARE ManoVet 2.0

Developed by taking care of every practical detail and by integrating veterinary functionalities.

- Ultra-quick image workflow (3" max.)
- Automatic dose information recording for all images
- Advanced guided measurements

Computer not included

- Intuitive and easy to use display, in English and French
- Image quality: Image processing specifically developed for use on animals. Possibility to adjust the image to vets' wishes
- Preset anatomical parts
- Possibility to save images with different image processing types
- Orientation presets for dogs, cats, horses and exotics
- Dose presets for every type of image depending on the animal size
- Automatically add image requests at the end of the image requests list allowing to make images again in case of kinetic blur or wrong dose selection, without having to reprogram image requests manually
- Guided measurements for Vertebra Heart Score
- Windows or DICOM printing
- JPG image sharing on the clinic network, allows to integration to the patient file on the management software

Our X-ray generators meet the requirements of the current radiation protection standards.

PORTABLE X-RAY GENERATORS

HF 1060

- High frequency X-Ray generator
- Exposure hand switch
- Dual laser for easy focal distance setting
- Convenient handling for advanced image quality
- Supplied in a robust carrying case
- Weight: 12.9 kg

Poskom 20BT Lite

- High frequency X-Ray generator
- Internal battery or external power supply operation
- Up to 650 exposures on one charge
- Dual laser for easy focal distance setting
- Supplied in a robust aluminium carrying case
- Weight: 7.2 kg

SURGERY

MONOPOLAR AND BIPOLAR ELECTROSURGERY UNITS

Coag&Cut M120

Perfect for daily small to medium surgeries

120W

The high performance **Coag&Cut M120** electrosurgery unit has a number of operating modes:

Cutting:

- ▶ CUT = pure Cut
- ▶ BLEND = Cut with Coagulation

Coagulation:

- ▶ FORCED = Superficial Coagulation
- ▶ SOFT = Deep Coagulation
- ▶ BIPOlar = Standard Bipolar Coagulation

Included accessories:

- A monopolar handpiece with a straight blade electrode
- A set of 10 electrodes
- A patient return plate with cable
- A bipolar handpiece with cable
- A single footswitch

ALL
ACCESSORIES
AUTOCLAVABLE!

Coag&Cut M200

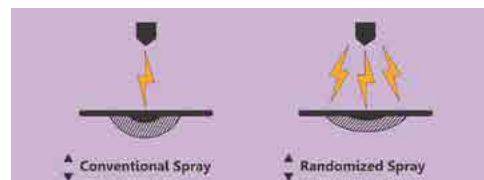

Perfect tool for intensive daily use

▶ 6SENSE Technology

For more sensitivity

▶ Randomized SPRAY Coag

Homogeneous, superficial & faster coagulation

▶ Smart Surgical Assist

Program manager allowing smart access to programs & settings

▶ Self Diagnosis

Quick identification of errors and immediate solution

200W

Included accessories:

- A monopolar handswitch handpiece
- A set of 5 electrodes
- A patient return plate with cable
- A bipolar handpiece with cable
- A CUT/COAG double footswitch

Electrosurgery

THE VETERINARY VESSEL SEALING Seal & Cut MV1

Vessel sealing, monopolar and bipolar electrosurgery **ALL-IN-ONE**

▼
**UNMATCHED
SURGICAL
PERFORMANCES**

Vessel sealing function for a wide range of clinical applications: ovariectomy, splenectomy, urology, hysterectomy, thoracotomy and more!

Surgery

Add high-tech precision to your surgical expertise!

- High withstand tissue seal
- Minimal thermal spread to adjacent tissue
- Tissue sticking and charring reduction
- Independent activation of bipolar cutting and coagulation

▼
**REUSABLE /
AUTOCLAVABLE**

► INNOVATION IN YOUR SURGICAL PRACTICE

5 mm Vessel Sealing Blade

- Seals up to 7 mm of blood vessels and tissue bundles
- Cutting of tissue by blade
- Minimally invasive surgery
- Constant control thermal spread
- Time savings
- Laparoscopy or open surgery

100% French innovation! INTERNATIONALLY PATENTED

T.O.M™ | Tripolar-Open-Multifunctional

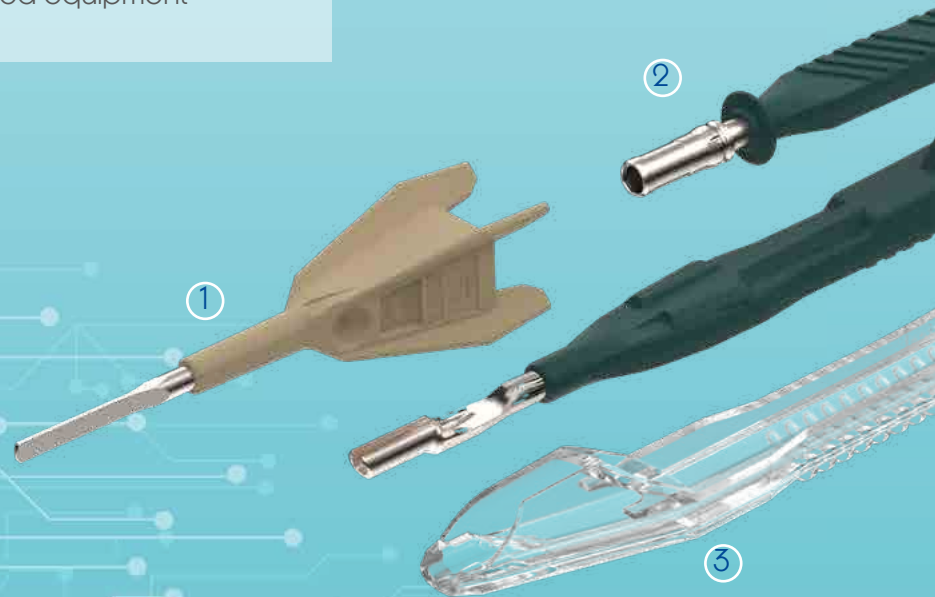

**Combines all the advantages of both monopolar and bipolar modes
WITHOUT their disadvantages!**

EFFICIENT

- Bipolar mode
- Many cutting and coagulation modes
- Improved haemostasis
- Simplified surgical preparation

PROFITABLE

- T.O.M™ replaces many electrosurgical devices
- Autoclavable handpiece
- Time savings resulting from optimised equipment management

NOW THE SURGERY IN ONE GO!

Cutting and coagulation of soft tissue at low voltage without a neutral plate

1 SINGLE INSTRUMENT FOR ALL YOUR SURGERIES

T.O.M™ ELECTRODE ①

Swivels easily with just 1 finger to adapt to all surgical procedures

T.O.M™ AUTOCLAVABLE BIPOLAR FORCEPS ②

EXTRA T.O.M™ ③

Aspiration of surgical mode and/or tissue irrigation

THE SAFEST FOR BOTH SURGEON AND ANIMAL

- Very low voltage operation
- Constant cutting depth
- No risk to the patient of plate burns
- Smoke evacuation on the production site (Extra T.O.M™)

SUSTAINABLE

- No need of a neutral plate or any additional accessories
- T.O.M™ autoclavable handpiece
- Eco-responsible packaging

« Thanks to its ease of use and safety, T.O.M.™ avoids problems of contact with the neutral plate and ensures uniformity of use from one animal to the next.
Sectioning is highly efficient and tissue dissection is easy. »

Dr Pierre DANIEL - CLINIQUE VÉTÉRAIRE BROCELIANDE - FRANCE

Generator and smoke aspirator on dedicated trolley

SUCTION UNIT

Askir 30

For a clean and bloodless operating site

- Portable and compact
- Suitable for all surgical procedures
- 1 litre autoclavable collection jar
- Flow: 30 l/minute

**HIGH
PRESSURE:
UP TO
1.4 BAR**

OXYGEN CONCENTRATOR VetOxyFlow OC1

High pressure to suit most of the anaesthetic machines

- Fully automatic
- Easy operation
- Silent and compact: 49x27x56 cm
- Easy maintenance

Surgery

NEBULIZER

Designed for aerosoltherapy

- Operating air flow: 5.2 l/min
- Pressure : 1.3 bar
- Neb-rate with 4 ml solution: 0.50 ml/min

APNEA DETECTOR apAlert

The original!

Easy anaesthesia respiration monitor

- Visual and acoustic alarms
- Display of seconds passed between two breaths
- Alarms and sensitivity adjustment

LARYNGOSCOPE

Set of 3 straight Miller blades

- 1 x 75 mm Miller blade (n°0)
- 1 x 100 mm Miller blade (n°1)
- 1 x 150 mm Miller blade (n°2)

DIAGNOSTIC MONITORING

| | |
|--------------------------------|-----------|
| MICROSCOPES / ECG | 22 |
| DOPPLER | 23 |
| PETMAP™ RANGE | 24 |
| MONITORING | 26 |
| COMPARISON TABLE..... | 27 |

MICROSCOPES VetScience

Diagnostic
Monitoring

B 01 - BINOCULAR MICROSCOPE

A simple but remarkably high-quality instrument designed to be used in veterinary practice

- Achromatic plans (4x/10x/40x et 100x)
- Large field ocular 10X /18 mm
- 3W LED lamp, adjustable brightness

B 02 - BINOCULAR MICROSCOPE

Ideally designed for intensive use in veterinary practice

- Infinity achromatic plans (4x/10x/40x et 100x)
- Large field ocular 10x/20 mm
- 3W LED lamp, adjustable brightness and focus

T 03 - TRINOCULAR MICROSCOPE

Ideally designed for intensive use in advanced veterinary practice

- Infinity achromatic plans (4x/10x/40x et 100x)
- Large field ocular 10x/20 mm
- 3W LED lamp, adjustable brightness and focus
- Coaxial focusing knob, course focusing range is 15mm and fine focusing is graduated in increment of 1 μ m.
- Optional camera and tablet

ELECTROCARDIOGRAPH

Vet ECG-VE 300/**3 channels**

Essential for further cardiological examination

- LCD three-channels display
- Recording of 7 channels simultaneously
- Printing of 7 channels simultaneously in automatic mode
- AC or battery powered
- Digital artefacts and interference filter
- Manual and automatic mode
- Adjustable parameters

VETERINARY DOPPLER ●

Vet BP

Blood pressure measurement, monitoring & small animals' examination

DESIGNED BY
MANO
MÉDICAL

Including 4 cuffs in different sizes, 1 blood pressure probe, a battery charger, a sphygmomanometer, a headset and a tube of gel

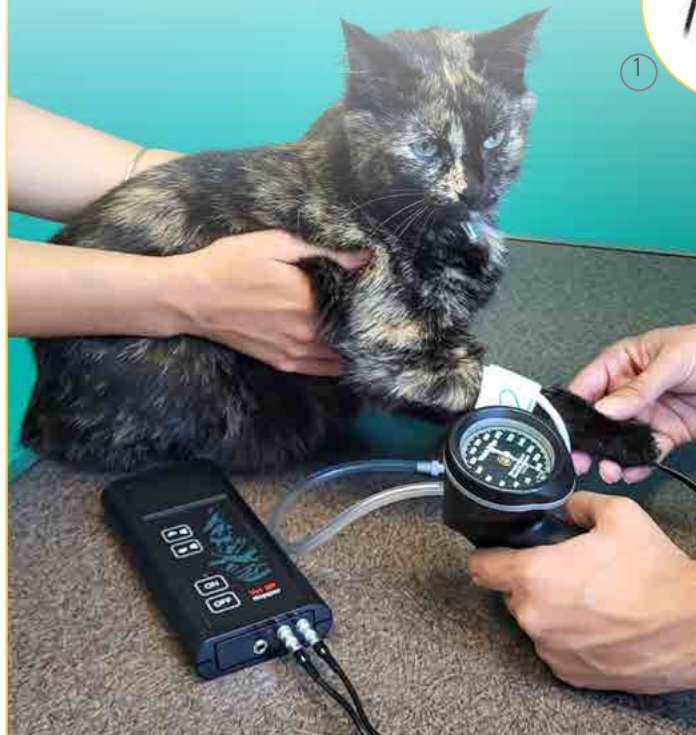

3 different probes :

- Blood pressure probe ①
- Pencil probe for easy exotic animal examination (option) ②
- Transoesophageal probe for use on anaesthetized animals such as a cardiac monitoring solution (option) ③

Cuff sizes: 4-8 cm, 6-11 cm, 7-13 cm and 8-15 cm

Diagnostic
Monitoring

Monitoring with Doppler:

The Doppler measures the flow detection in the artery during anaesthesia, intensive care, serial or general measuring. The veterinary team will hear a sound reflecting the heart rate and pulse.

Blood pressure measurement prior to an infusion:

Arterial pressure can be a suggestive indicator of an animal's condition. The veterinarian can then adjust the infusion according to the results.

PetMAP™

The Blood Pressure Lead Solution!

Convenient, Easy to use, Accurate and Profitable

PetMAP™ graphic 2

- Systolic and diastolic blood pressure
- Mean arterial blood pressure (MAP)
- Heart rate

PetMAP™ g3

- Systolic and diastolic blood pressure
- Mean arterial blood pressure (MAP)
- Heart rate
- Temperature

PetMAP™ +II BT

- Systolic and diastolic blood pressure
- Mean arterial blood pressure (MAP)
- Heart rate
- Temperature
- ECG (optional module)
- Capnography (optional module)

NEW:

Equipped with Bluetooth® to display screenings in real time on a large monitor

All the PetMAP™ include 7 cuffs in different sizes (2, 2.5, 3, 3.5, 4, 4.5 & 5.5 cm)

Available with pulse oxymetry:

PetMAP™ +II SpO₂ BT

MULTIPARAMETER MONITORING

VitalSurv MM1 / MM2

Compact and portable veterinary monitor

► **VitalSurv MM1**

Temperature, pulse oxymetry, blood pressure & ECG

► **VitalSurv MM2**

Temperature, pulse oxymetry, blood pressure, ECG & sidestream capnography

- 12" (30 cm) large touchscreen
- Battery operation for efficient post surgical monitoring
- Small and lightweight (5 kg, only 9 cm thick!)
- Possible connection to USB keyboard and mouse
- Set-up on touchscreen or on front buttons
- Long-life water trap for capnography (MM2 model)
- ECG 3 channels with alligator clips (15-350 bpm range)
- Optional adaptable esophageal probes

Diagnostic
Monitoring

**Universal
ECG connector**
designed
to be
connected
to all patches
and crocodile
clips

CAPNOGRAPH

Capno 5

- Real-time CO₂ waveforms (capnogram)
- End-tidal CO₂ (ETCO₂)
- Fractional inspired CO₂ (FiCO₂)
- Respiratory rate (RR)
- Audible and visual apnea alarms
- Delivered with table mount

TYPICAL APPLICATIONS IN VETERINARY MEDICINE:

- Acute (post-trauma) or chronic (arthritis...) pain treatment
- Post-surgical or trauma wound healing promotion
- Inflammatory symptom reduction
- Muscle and ligament trauma reduction
- Dental abscesses and gingivostomatitis healing
- Lick granuloma

Cure & Care

Large touchscreen (4.3" / 10.75 cm) for clear settings and display of parameters

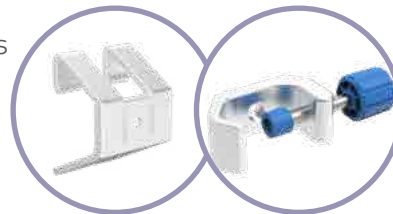

INFUSION PUMP ManoPump iV1

For safe and precise administration

Optional
fluid warmer module
(only available on iV1 model)

- Small and light (1.45 kg)
- High performance battery (up to 10 hours run time)
- Many settings available such as:
 - ✓ Overall infusion volume
 - ✓ Requested flow
 - ✓ Infusion total time
- High sensitivity of settings (bubbles and occlusion pressure)
- Transfusion compatible
- Compatible with all infusion sets dedicated to pumps
- **Kennel mount & IV stand support included ▶**

NEW!

Cure & Care

INFUSION PUMP ManoPump iV2

- 2.8" (7 cm) screen
- Simple and intuitive control panel
- Other parameters similar to ManoPump iV1

SYRINGE PUMP ManoPump SP1

- Automatic recognition of syringe sizes (5, 10, 20, 30 and 50/60 ml)
- Large touchscreen (4.3" -10.75 cm) for a clear display of parameters
- Multi-function operation with 3 modes: ml/h (time, rate mode), body-weight mode and micro mode

FLUID WARMER Vet Temp3

- Use with standard fluids, blood and TPN fluids
- Accepts standard tubing sets for small animals
- Temperature sensors allow the temperature control of the heating plate

Heating Mat

HEATING MAT Carbon Tech V2

Top grade comfort and safety for the patient and for the user!

- ▶ Effective warming
- ▶ Even heat distribution
- ▶ Easy to clean and easy to disinfect
- ▶ Low maintenance costs
- ▶ Energy efficient
- ▶ Waterproof
- ▶ Environmentally friendly

Cure & Care

Table model: 52x112 cm
(Power: 60W)

Good to know about CarbonTech V2:

- Safe temperature regulation (integrating a sensor and a high accuracy limiter not exceeding 42°C-107.6°F)
- 3 power levels (50%, 80% and 100%) allowing to adjust the power intensity (the speed of heating interval)
- Safety shutdown after 12 hours of use
- Disconnectable power block for safe cleaning

ULTRASONIC SCALER

● D7 ultrasonic scaler

Including a 400 ml water tank and a detachable and autoclavable handpiece

- Applications: scaling, periodontal and endodontic treatments
- Optical handpiece for a more convenient operation
- SATELEC compatible handpiece

7 different tips for endless applications

Vet200 Plus ●

Portable and powerful Piezo-electric scaler

Perfect for veterinary use

- 5 piezo-ceramic tips
- Automatic frequency tracking
- Pressure from 0.1 to 0.5 bar
- EMS compatible detachable handpiece

MICROMOTOR AND POLISHER

● Strong

Light, compact and handy for interventions on small animals or devitalized teeth

- Compact and light type E motor
- Regular speed from 0 to 35 000 RPM
- 1:1 contra angle included

Clinic Fittings

HEATED ULTRASONIC CLEANERS

Ultra-C6

6 LITRES

- Ultrasonic power: 180 Watts max
- Inside dimensions Lxwxh: 300x150x150 mm
- Outside dimensions Lxwxh: 325x180x305 mm
- Stainless steel tank
- Stainless steel basket with 10mm mesh + lid
- Heating power: 300 Watts
- Mechanical timer adjustable from 0 to 30 min, ultrasonic automatic stopping
- Evacuation valve

Drain hose option

The investment in a heated ultrasonic cleaner will be quickly profitable. In addition, it needs a low quantity of cleaning concentrate: between 2 and 5% of water volume.

Ultra-C15

15 LITRES

- Ultrasonic power: 360 Watts
- Inside dimensions Lxwxh: 330x300x150 mm
- Outside dimensions Lxwxh: 360x330x330 mm
- Stainless steel tank
- Stainless steel basket with 10mm mesh + lid
- Heating power: 400 Watts
- Mechanical timer adjustable from 0 to 30 min, ultrasonic automatic stopping
- Evacuation valve

Clinic Fittings

AIR PURIFIER Hygéolis

**Do not mask the odors,
ELIMINATE them!**

- Efficient: intensive or continuous odor elimination
- Cost savings: low energy consumption
- User-friendly: plug & play, compact, soundless
- Made in France

NEW!

Hygéolis allows you to:

- ✓ Protect your staff
- ✓ Protect animals
- ✓ Improve working and reception conditions

UV-C GERMICIDAL FLOW LAMP Aseptor

**One of the most effective methods of safe air
desinfection to get rid of micro organism in your
clinic**

- Extremely effective thanks to its high-energy radiation
- Safe for people and animals
- Easy to use, maintenance free
- 2 models:
 - ASEPTOR 236: up to 35m² (90m³)
 - ASEPTOR 255: up to 60m² (150m³)

Move easily your Aseptor lamp:

- Operating room
- Kennel
- Reception area

Disinfection

AIR PURIFIER

EOLIS Air Manager

Patented smart filtration system that guarantees healthy indoor air!

- Protection from viruses, bacteria, spores and chemicals
- Anywhere in the clinic (operation room, laboratory, consulting room, reception area...)

Intensive professional Plug & Play use

- Constantly adapts to the level of pollution in the room
- View air quality in real time
- Medical-grade filtration system

- ✓ Air and surface decontamination in veterinary clinics
- ✓ Protection of professionals (exposure to anaesthetic gases, disinfectants, etc.)
- ✓ Animal protection (e.g. canine parvovirus, feline calicivirus, staphylococcus aureus...)

EOLIS Air Manager efficiency tested by independent laboratories:

Air

99.6%

Human
Coronavirus 229E
eliminated in 10 min.

96%

Aspergillus
brasiliensis eliminated
in a single pass

91%

Staphylococcus
epidermidis elimi-
nated in a single pass

Surfaces

99%

Murine norovirus and
Adenoviruses type 2
eliminated within 1 hour
(DeepClean mode)

90%

Staphylococcus
aureus eliminated within
1 hour (DeepClean
mode)

NEW!

Air Coach

Measures, displays and analyzes your clinic air quality

- High precision sensors allowing to measure CO₂, Volatile Organic Compounds (VOCs), fine particules...
- Gauges indicating the concentration of each pollutant in the air and displaying the general status of indoor air quality
