

Since 1984

**#1 FRENCH VET EQUIPMENT
MANUFACTURER**

VETINOX

As an expert in animal health, you need to rely on trusted, accurate and ergonomic equipment to ease your daily practice.

Whether standard or bespoke, VETINOX is the leading veterinary French equipment manufacturer that exceeds your requirements.

1984

With a team of passionate professionals, VETINOX imagines, designs, manufactures and markets qualitative and innovative veterinary equipment which, thanks to a regular exchange with vets, continues to improve to meet current veterinary practices.

2018

Change of ownership and strategic turn with significant investments in the development of new products and the upgrading of production tools.

2020

New production tools (laser cutting / folding machine / automated sawing)

2022

New factory

VETINOX Guarantee - **5 years** for most of its Products and **10 years** for its ELITE range - testifies to the quality and durability of its Products, offering customers peace of mind and long-term savings, while helping to protect the environment.

Definition of the VETINOX limited guarantee

Article 1 - Duration

1.1 VETINOX guarantees its Products, hereinafter referred to as «VETINOX Products», in accordance with the terms and conditions set forth herein. The standard Guarantee period is 5 years from the date of purchase, unless otherwise stated for Products in the ELITE range.

1.2 For Products in the ELITE range manufactured by VETINOX, with the exception of electrical components, a 10-year Guarantee applies from the date of purchase.

1.3 The Guarantee for the electrical components of VETINOX Products is 2 years from the date of purchase.

Article 2 - Activation

2.1 To benefit from the Guarantee, the Customer must register his/her VETINOX Product after delivery. The registration must be made on the VETINOX website at www.vetinox.fr, under the heading «Guarantee» within a maximum period of 30 days after the date of purchase.

2.2 When registering, the Customer must provide his/her full contact details as well as the serial number of the VETINOX appliance. The serial number is indicated on the VETINOX labels.

2.3 If the Customer fails to register its Product in accordance with the terms of this Article 2, the VETINOX Guarantee will not be activated, and VETINOX will not be liable for any subsequent Guarantee claims.

Article 3 - Scope

3.1 The Guarantee covers defects in workmanship and materials in VETINOX Products in accordance with the terms and conditions set forth in the VETINOX Guarantee Policy.

3.2 Products repaired or replaced under this Guarantee will be guaranteed for the remainder of the original Guarantee applicable to the original Product.

Article 4 – Exclusions

4.1 The Guarantee does not apply to damage resulting from improper use, negligence, unauthorised modifications, accidents, incorrect installation or any other act that does not result from a manufacturing or material defect.

4.2 The Guarantee does not cover the electrical components of VETINOX Products beyond 2 years.

Article 5 - Remedies

The Customer's exclusive remedy for any defect covered by the Guarantee is limited to repair or replacement, at VETINOX's discretion. No other claims or consequential damages are covered by this Guarantee.

Article 6 - Applicable Law and Jurisdiction

This Guarantee is governed by the laws of France, and any dispute arising out of this Guarantee shall be submitted to the exclusive jurisdiction of the competent courts of Montluçon, France.

Article 7 – Contact VETINOX

For any Guarantee claim or question relating to the Guarantee of VETINOX Products, please contact the VETINOX customer service at the following address: contact@vetinox.fr

Article 8 - Modification

VETINOX reserves the right to modify the terms of this Guarantee without prior notice.

* *except electrical components: 2 years*

CAGES

5 good reasons to choose our cages

GO FOR QUALITY

Since 1984, VETINOX specializes in the design and manufacture of seamless cages from the finest raw materials to meet the highest quality standards for the daily comfort of patients.

SAVE TIME & MONEY ON INSTALLATIONS

Thanks to VETINOX's smart connection system, installing, combining, and stacking cages have never been easier: just connect cages to one another.

A CLEAN & TIDY CLINIC

VETINOX stainless steel and polyester cages have dedicated drawers for collecting patients' fluids. As cages are slightly tilted forwards, fluids gently flow into the drawers to ease your daily cleaning.

WIDEST RANGE ON THE MARKET

As a standard, VETINOX manufactures 3 types of cages (stainless steel / polyester / cat-friendly), which can be customised with stainless steel or glass doors as well as numerous accessories to make them your very own cages.

TAILORED TO YOUR REQUIREMENTS

Don't worry if you can't find what you're looking for despite our wide portfolio, as VETINOX also manufactures its stainless-steel cages to measure.

Made in France from quality materials, VETINOX stainless-steel cages are spacious for the everyday comfort of patients. Their design makes it easy to combine different formats for unrivalled flexibility. Available with stainless steel or glass doors, their superfast push-fit assembly setup enables you to create sets to meet your specific needs. VETINOX stainless-steel cages are available both in standard version and bespoke.

- Seamless finish
- Very strong material for long-term reliability
- Spacious cages with gratings for optimum comfort
- Fluid recovery helps keep your clinic clean
- Combine & stack to suit your needs
- Wide range of different models, also made to measure

glass doors

TABLES

FOCUS ON THE ELITE TABLES

ELITE tables are designed to help prevent musculoskeletal disorders

HELPS PREVENT MUSCULOSKELETAL DISORDERS !

Musculoskeletal disorders (MSD) affect the joints of the upper limbs (shoulder, elbow, hand, wrist, and fingers) as well as the lower back. Professional activity can play a role in their appearance, duration, or aggravation, particularly when the organisation of work (distribution of the workload, definition of tasks, management of replacements, etc...) gives rise to two types of risk factors :

- **Physical** : repetitive movements, static work, excessive efforts, extreme joint positions, carrying heavy loads, etc... ;
- **Psychosocial** : time pressure, lack of autonomy, lack of social support, monotonous work, etc...

MSDs have numerous consequences for employees, which can have a long-term impact on their quality of life: pain, restrictions in skills, disabilities, etc..., sometimes leading to loss of employment. Repeated absences of employees can also have repercussions on the work group : changes in the distribution of workloads, disorganisation, deterioration in the social climate, repeated replacements, etc..., which in turn can lead to new cases of MSDs within a company.

Occupational risks in the veterinary profession

Whether biological, physical, or chemical, risks affect the day-to-day work of vet clinic teams. In addition to injuries from bites, scratches and cuts, the risk of allergies and exposure to drugs and toxic products, vets are the target of back problems (lumbago and back pain) and musculoskeletal disorders linked to handling and lifting animals, prolonged awkward postures and carrying heavy loads.

STRETCHER TABLES

The VETINOX stretcher table is functional, practical, and robust. Made in France from quality materials, it provides comfortable, efficient patient transportation. Available with a removable stainless-steel or PVC top with retractable handles.

- Very strong material for long-term reliability
- Functional & robust equipment
- Removable stainless-steel or PVC top with stainless-steel frame (6 colours to choose from)

CODE	DESIGNATION
TA100 100	Stretcher with stainless steel table top - (L 1250 x l 600 mm - H 910 mm)
TA100 200	Stretcher PVC top with stainless-steel frame (6 colours to choose from) - (L 1250 x l 600 mm - H 910 mm)

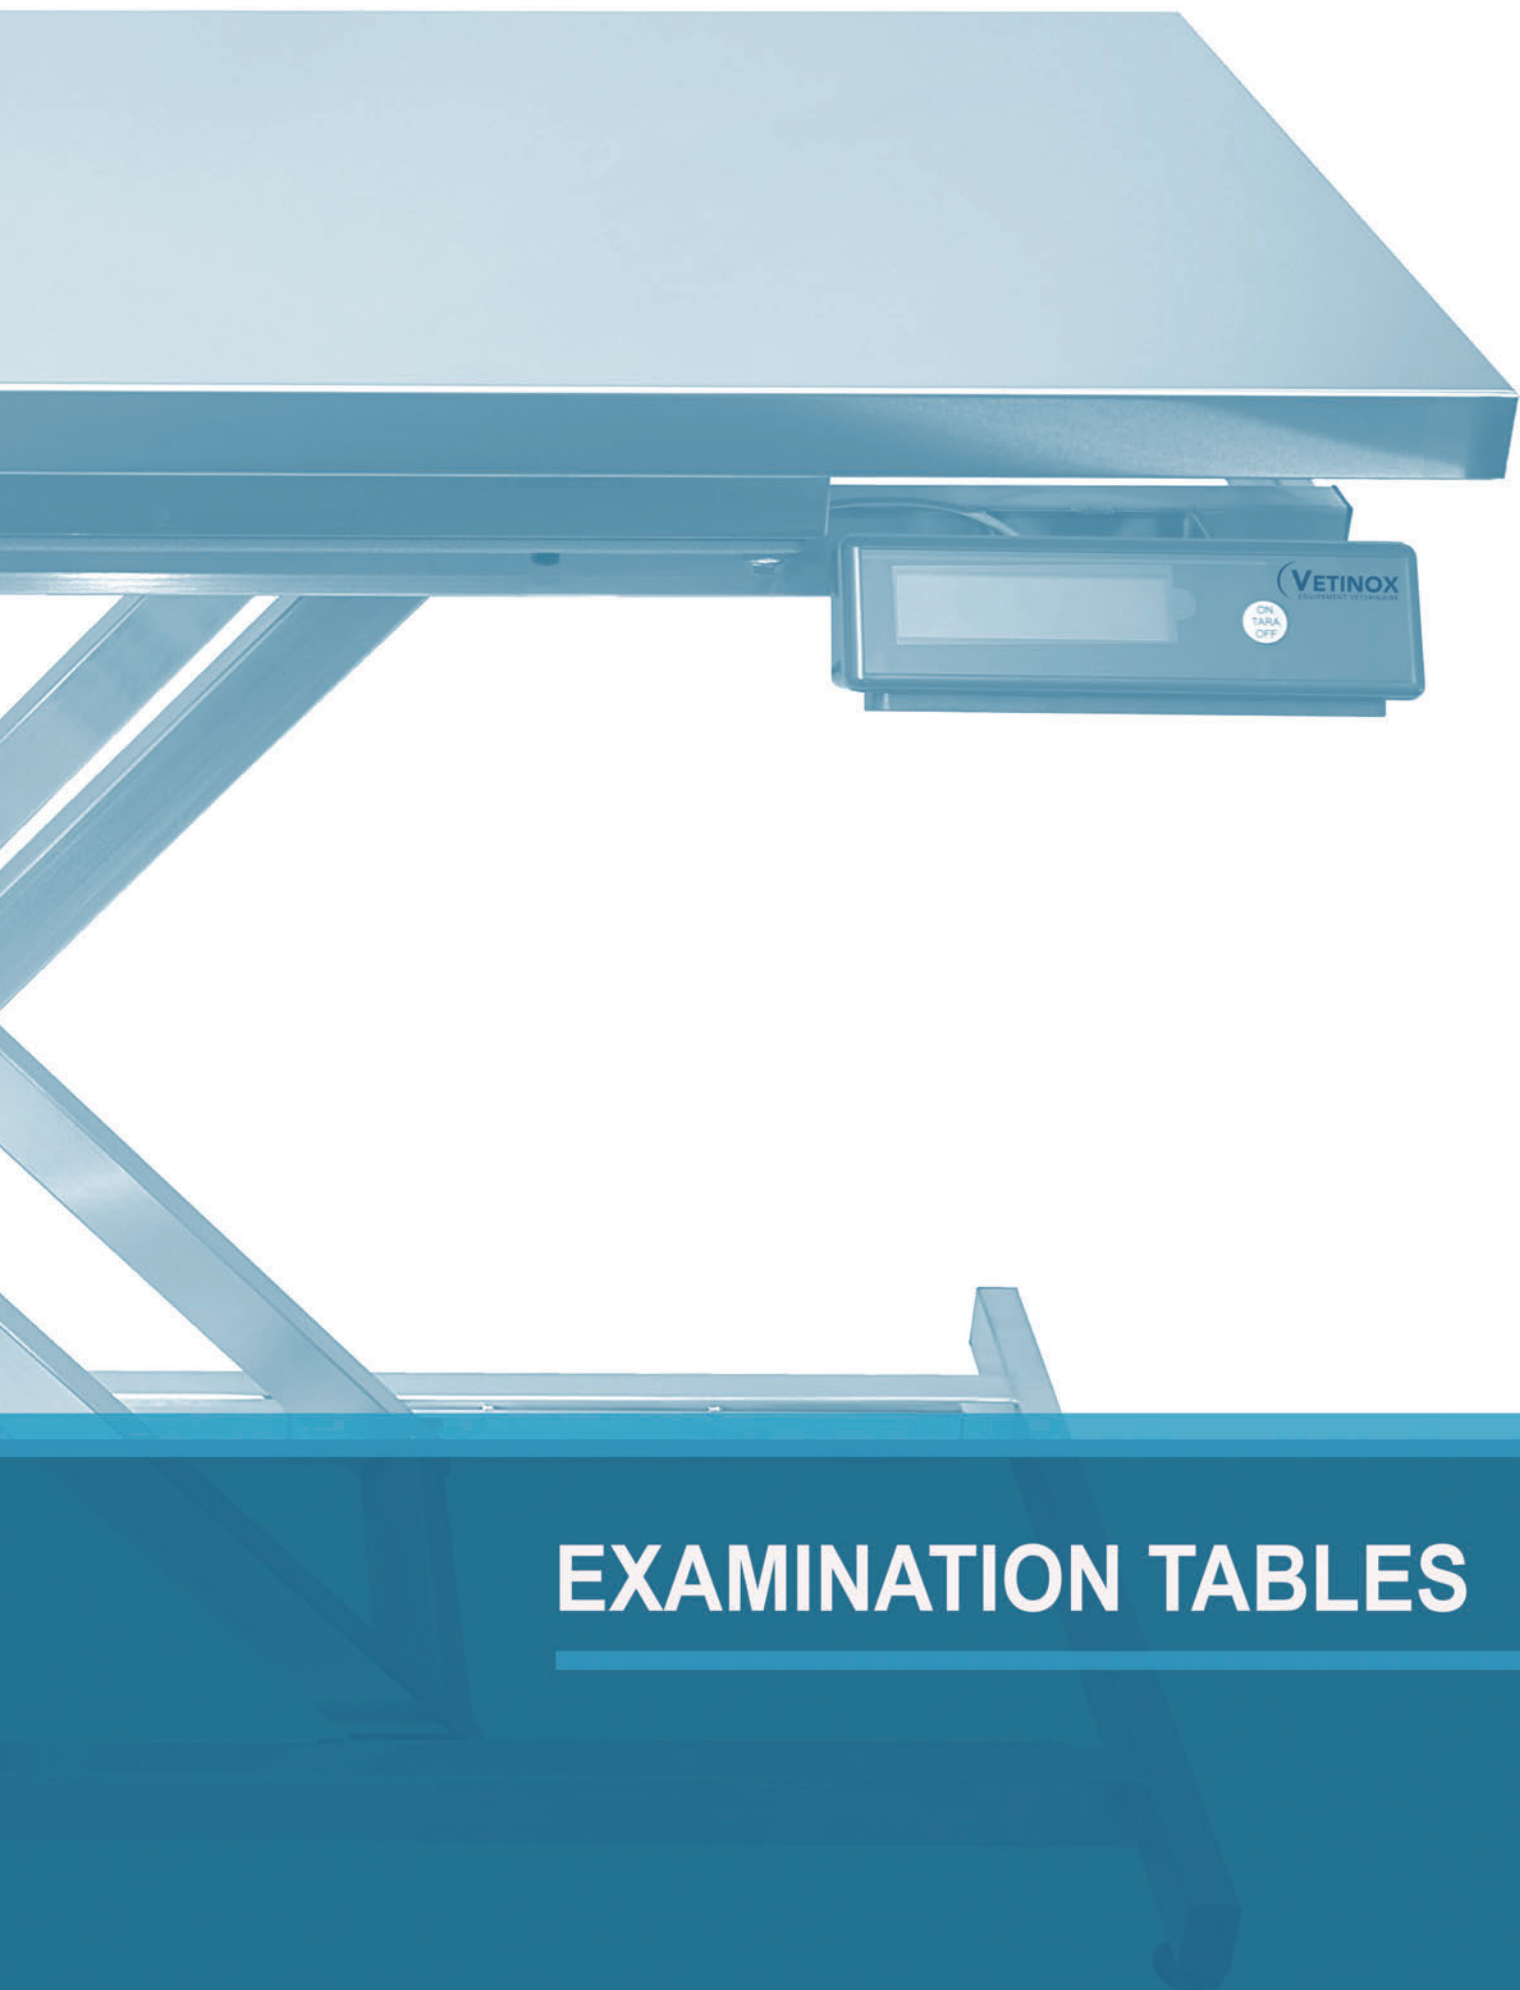

Especially designed to help prevent musculoskeletal disorders, the ELITE lift exam stretcher is a 2-in-1 equipment, available with a stainless-steel or radiology top. An optional wired remote control makes its use easier. Its whisper-quiet stainless-steel frame with a 225 mm loading height, allows patients to climb onto the table without any help from the vet.

- 2-in-1 table = stretcher + examination functions
- Exceptional build quality & ergonomics
- Stainless-steel or radiology top with button or wired remote control
- Helps prevent musculoskeletal disorders

TA701 111	Heated surgical table with one drain outlet with 4 retractable wheels (electrical Trendelenburg - anti-Trendelenburg setting) lateral tilt (L 1400 x W 530 mm)
TA701 115	Heated surgical table with two drain outlets with 4 retractable wheels (electrical Trendelenburg - anti-Trendelenburg setting) lateral tilt (L 1400 x W 530 mm)

The VETINOX electrical surgical table with radiology top is specially designed to take radiographs directly on the table. Made in France, its reliability and quality are exceptional. Its whisper-quiet stainless-steel structure allows extremely precise settings in all directions (height, Trendelenburg/anti-Trendelenburg, for the lateral tilt version). Available with 3 different tops and 4 retractable wheels to move the table effortlessly.

- Versatile table for advanced surgical practice
- Silent stainless-steel structure for a quiet working environment
- Precise and reliable electric settings
- Helps prevent musculoskeletal disorders
- 4 retractable wheels to move the table easily
